

Quick Notes

About ProofMyClass.com

- Who uses it? -

Underclass customers who do composites for multiple schools each season. Customers using FLOW (with ImageMatch export), ImageMatch, Quixi, data file submission are eligible. (At this time we cannot accommodate FLOW to DP2 users without prior approval from the lab.)

- What is it? -

ProofMyClass.com is a web-based program that will allow ACI to upload data and images, or composite jpgs for the studio or school to edit/proof/approve online, for a small fee per school.

- When does it take place? -

Images and data can be uploaded as soon as the final retake job for a school has been completed at ACI. Composite jpgs can be uploaded after creation, the time frame is dependent upon whether they are "Print Now", or "Deferred".

- Why should I use it? -

It saves time! The studio doesn't have to be the middleman in receiving proofs and sending them to the school. Proofs or images and data get uploaded online, and the school will be notified right away. When all classes have been edited or approved, an email comes to ACI with updated data and products can be fixed or created CORRECTLY right away! No more downloading images from an FTP folder or awaiting an emailed or paper proof from the lab!

It saves money! When you save time, you save money. When the school can get their ACCURATE products days or even weeks sooner than they are used to, repeat business is all but guaranteed.
